

**In the drawings:**

The Replacement Drawings submitted herewith correct reference numeral 114 in Fig. 1 with 14 and add the audio/vid source 15 and the video circuit generator card 17 for consistency with the original claims and the specification as amended herein.

**REMARKS**

In the Office Action dated October 19, 2005, the drawings are objected to, claims 13 and 14 are rejected under 35 U.S.C. § 112, 2nd ¶, claims 1 - 4, 12 and 15 are rejected under 35 U.S.C. § 103(a), claim 16 is objected to, but indicated as being allowable, claims 7 - 10 are allowable.

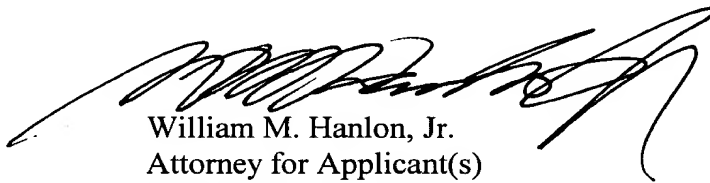

Accordingly, claim 1 is cancelled and the dependency of the remaining claims revised to depend from claim 7. Claim 14 has been amended to more specifically define the features of Applicants' invention and to particularly point out and distinctly claim such features. The features defined by claim 13 have been added to drawing Fig. 6.

The Replacement Drawings submitted herewith correct reference numeral 114 in Fig. 1 with 14 and add the audio/vid source 15 and the video circuit generator card 17 for consistency with the original claims and the specification as amended herein.

As all of the objections and rejections have been overcome, and since all of the claims have now been amended to a form indicated by the Examiner as being allowable, or were already in allowable form, it is respectfully submitted that the application and claims 2 - 4, and 7 - 16 are in condition for allowance; a notice of which is respectfully requested.

Respectfully submitted,

YOUNG, BASILE, HANLON, MacFARLANE,  
WOOD & HELMHOLDT, P.C.

William M. Hanlon, Jr.
